PROFESSIONAL SUMMARY

DevOps & Cloud Engineer with 2+ years of hands-on experience building scalable, cloud-native infrastructure, automating CI/CD pipelines, and optimizing VFX render systems. Proven track record of reducing render farm queue times by 35%, provisioning AWS/EKS Infrastructure as Code with Terraform, and implementing GitOps workflows with ArgoCD. Skilled in container orchestration using Kubernetes and Docker across production environments. Combines VFX pipeline expertise (Prism, Deadline, Kitsu) with cloud engineering capabilities across AWS, Ansible, and Jenkins. Currently completing NTI Cloud DevOps Accelerator Program (RHCSA, AWS Solutions Architect, OpenShift, GitLab CI/CD).

TECHNICAL SKILLS

Cloud & IaC	AWS (EC2, EKS, ECR, S3, IAM, VPC, ALB, Auto Scaling) · Terraform · OpenShift · Docker · Kubernetes
Containers & Orch.	Kubernetes (kubeadm, EKS) · Helm · ArgoCD · Docker · OpenShift Container Platform
CI/CD & Automation	Jenkins · GitLab CI/CD · GitHub Actions · Ansible · GitOps Workflows · Git & GitHub
Monitoring & Sec.	Prometheus · Grafana · Trivy · FortiGate NSE4 · Sophos · Palo Alto · VPN Design
Systems & Networks	Linux (RHCSA) · Windows Server · VMware ESXi · Proxmox · Active Directory · CCNA
Pipeline & VFX	Prism Pipeline · Deadline · Kitsu · ComfyUI · 3ds Max · Maya · Houdini · Nuke · Unreal Engine
Storage & Scripting	TrueNAS · QNAP · ZFS · NFS · SMB · Python · Bash · YAML

WORK EXPERIENCE

Visualization & Render Systems Engineer | Pinnacle Visions Aug 2025 – Present • Egypt

- Deployed **ComfyUI AI Server** with HTTPS (Nginx) and multi-user authentication — eliminating per-workstation setup and reducing deployment time by ~80%.
- Optimized **Deadline Render Farm** scheduling and worker allocation, cutting average queue time by **35%** and boosting VFX throughput.
- Customized **Prism Pipeline** source code and hooks to enforce NAS multi-root architecture, automated render path injection, and DCC-agnostic versioning (3ds Max, Nuke, Maya).
- Integrated Kitsu Server into production workflows; built Telegram & email alerting via Deadline event plugins for real-time farm monitoring.

IT Network & Systems Engineer | Gemini Studio Mar 2025 – Jul 2025 • Egypt

- Designed enterprise network security using Sophos Firewall — VLAN segmentation, VPN tunnels, and traffic filtering for a 60+ seat studio environment.
- Administered VMware ESXi cluster and TrueNAS ZFS storage (SMB/NFS shares, snapshots); managed Windows Server, AD, and remote desktop services.
- Optimized render farm operations and scripted DCC software provisioning, reducing workstation deployment time by ~60% and cutting manual setup steps.

- Provided advanced technical support for + workstations across creative teams; installed and maintained full DCC stack (Maya, Houdini, Nuke, 3ds Max, Unreal Engine, Corona).
- Supported VMware virtualization, RDS, and NAS storage management; authored runbooks that standardized incident resolution, reducing repeat tickets by ~40%.

KEY PROJECTS

ComfyUI Centralized AI Server | Pinnacle Visions

- Deployed multi-user ComfyUI server with HTTPS (Nginx reverse proxy), authentication middleware, and shared GPU model storage — eliminating per-workstation AI tool setup.

Prism Pipeline Deep Customization | Pinnacle Visions & Gemini Studio

- Modified Prism Pipeline source code and plugin hooks to enforce NAS-based project structures, automated render output path injection, and DCC-agnostic version management — removing Department/Task workflow dependency.

Deadline Render Farm Automation & Monitoring | Pinnacle Visions

- Built custom Deadline event plugins for real-time stalled-job detection, Telegram/email alerting, and offline-worker notifications — reducing human monitoring overhead to near-zero.

IT Infrastructure Implementation | Gemini Studio

- Designed and deployed full studio IT stack: Sophos firewall, VMware ESXi cluster, TrueNAS storage with ZFS, Active Directory, and remote desktop services for a 25+ seat production environment.

EDUCATION

B.S. Electronics & Communication Engineering

Higher Technological Institute, 10th of Ramadan City

Graduation Project: Design & Implementation of a Secure LAN Using Advanced Cybersecurity Techniques **Grade: Excellent**

Sep 2020 – Jan 2025

TRAINING & CERTIFICATIONS

Cloud DevOps Engineering Track | National Telecommunication Institute (NTI) Jan– Apr 2026

- Red Hat System Administration I & II (RHCSA prep) · OpenShift · AWS Cloud Foundations · AWS Solutions Architect · AWS Security
- Docker & Kubernetes · Terraform (IaC) · Ansible Automation · Git & GitHub · CI/CD with Jenkins

Cybersecurity Track (120 hrs) | Information Technology Institute (ITI) Aug – Sep 2024

- Network Fundamentals · Advanced Networking · Cybersecurity Essentials · Ethical Hacking · FortiGate NSE4 · Palo Alto Firewall

Additional Certifications

- CCNA – Cisco Certified Network Associate (120 hrs)
- MCSA – Microsoft Certified Solutions Associate
- Cybersecurity for Beginners – MaharaTech / ITI Mooca (Network Fundamentals, Ethical Hacking, Python, RHEL Admin, Cloud & Virtualization) | Jun – Jul 2024
